PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with hands-on experience building and deploying scalable applications using **Java**, **Spring Boot**, **React**, and **PostgreSQL**. Strong foundation in **Data Structures and Algorithms** with **700+ coding problems solved** across competitive programming platforms. Experienced in REST API development, authentication using **JWT/OAuth 2.0** and AI-powered applications.

TECHNICAL SKILLS

Languages: Java, SQL, C++
Backend Technologies: Spring Boot, Spring MVC, Hibernate, Spring Data JPA, RESTful APIs, Microservices, MCP (Model Context Protocol)
Frontend Technologies: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
Security: Spring Security, JWT, OAuth 2.0
Database: MongoDB, PostgreSQL
Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, SDLC, System Design

EDUCATION

Lakshmi Narain College of Technology, Bhopal 2022 – 2026
B.Tech in Computer Science & Engineering **CGPA: 8.19 / 10.00**

R.O.S Public School – Class XII (CBSE), Grade: 76.8% 2021

Modern Indian School – Class X (CBSE), Grade: 90.6% 2019

PROJECTS

- **AI Dev Assistant – MCP-Based AI Code Review & Documentation Tool** (GitHub)
  Tech Stack: Java 21, Spring Boot, React.js, MCP Server, PostgreSQL, GitHub OAuth2, OpenRouter API
  - Engineered a modular 3-tier architecture — React frontend, **Spring Boot** backend, and standalone **MCP (Model Context Protocol)** server, enabling LLMs to navigate and analyze repository source code
  - Built **4+ GitHub intelligence tools** (file reading, code search, complexity analysis, PR diffing) exposed via MCP, enabling iterative tool invocation and context-aware repository analysis by the LLM
  - Implemented secure **GitHub OAuth2** authentication with **AES-encrypted token storage** and **JWT authorization**, enabling secure AI interactions with GitHub repositories
- **Incognito Campus – Real-Time Anonymous Messaging Platform** (Live Demo)
  Tech Stack: Java 17, Spring Boot, React.js, WebSocket, MongoDB, Gemini AI API | Vercel, Render
  - Developed an anonymous identity generation system creating **400K+ unique username combinations** using adjective-animal pairs with randomized numeric suffixes
  - Integrated **Gemini AI API** to automatically summarize chat room conversations, grouping multiple messages into concise digests for quick review
  - Deployed full-stack application with **React** frontend on **Vercel** and **Spring Boot** backend on **Render** using **Docker**, with **MongoDB Atlas** as cloud database

ACHIEVEMENTS

- Solved **700+ DSA problems** of varying difficulties across LeetCode, GeeksforGeeks, and Code360
- Achieved a **peak LeetCode rating of 1653**
- Achieved **5-star Java** rating on HackerRank

CERTIFICATIONS

- **Java Full Stack Development** — Wipro TalentNext Program (View Certificate)
- **Java Programming Fundamentals** — Infosys Springboard (View Certificate)
